Full job description

Your new company

This international leader operates at the forefront of 11 diverse markets globally including environment, advanced weapons solutions, power and cyber security. They are currently seeking a confident junior systems engineer to join their defence team in the Newcastle region and for them to become a part of their diverse and supportive team.

Your new role

In your new role as AGAT Engineering Support you will be tasked with developing and updating interface description documentation to supply to external agencies and contractors as furnished information. You will also undertake the development, documentation, and execution of transition plans for Air-Ground-Air-Transport that supports the integration, Verification and validation at twelve Defence sites while maintaining current operations. You will coordinate with internal and government stakeholders ensuring that appropriate engineering approvals are agreed and endorsed prior to and during transition activities. You will provide support in meetings and workgroups when necessary.

What you'll need to succeed

- Tertiary Degree level qualifications in Engineering or related discipline.
- Experience in Project Engineering or equivalent.
- Previous experience in Engineering/Technical support with Verification and Validation activities.
- Must hold an active Australian Defence Security Clearance at (NV1) or one that is able to be reinstated.
- General understanding of Voice Communication Systems.

What you'll get in return

The opportunity to grow your career with exposure to the defence industry in a supportive high achieving culture that invests their time in your development, competitive salary and conditional work from home benefits once settled into the role.

What you need to do now
