Full job description

Your new company

This well organised and dynamic company is seeking a Configuration Officer to join their leading team who serve as experts in communication and electrical technologies for Defence and Cyber Security fields. This is an incredible opportunity to progress your career within an expanding organisation with over 80 years + industry experience.

Your new role

As the new Configuration Officer you'll be in charge of the successful delivery of the configuration management for designated defence simulators and corresponding training devices. Along with your team you will be responsible for integrating systematic changes and their technologies across different life phases of the model to ensure maximum success and producing a formal Training System baseline. Your duties will include:

- Create defined build phases for the integration of baseline changes and associated artifacts
- Lead testing of different configuration life phases in accordance with customer requirements
- Monitor the final stage progresses and appropriately react to varied desired outcomes, reporting any notable project recordings
- Support internal teams with project audits relating to quality and functional conditions

What you'll need to succeed

- Tertiary Education or relevant education in a technical discipline (E.g. Engineering, IT, Technical Office or related area
